RESEARCH EXPERIENCE

DATA GATHERING AND RESEARCH METHODS

Survey methods: Questionnaire design for standardized CATI and online surveys, survey programming (LimeSurvey, SoSci Panel), design and implementation of survey experiments, computation of weighting procedures (iterative proportional fitting), imputation of missing values

Data preparation: Preparing and merging miscellaneous data sources like general statistics, survey, electoral, spatial or event data (cross-sectional, longitudinal, multilevel, etc.)

Spatial data: georeferencing, converting and harmonizing miscellaneous non-geospatial data to ESRI shapefiles (points, polygons), complex shapefile editing composed of points, polygons or lines (fixing, merging, cutting, dissolving, extracting, buffering, etc.)

Biographical data: Building episodic data sets

DATA ANALYSES AND STATISTICAL SOFTWARE

Causal Impact Analysis: interrupted time series analysis (Bayesian structural time series models), statistical matching (exact, propensity score, dynamic time warping)

Panel Analysis: vector autoregression, vector autoregressive panel analyses, dynamic spatial panel analysis (spatial Durbin error models)

SEM: Multi-level structural equation and path modelling, longitudinal path analysis (latent change and autocorrelative models), generalized linear models

Multi-level analysis: multi-level regression analysis, shared frailty Cox-Regression, mixed-effects Poisson regression

Other Regression Analysis: autoregressive models, extended-beta binomial regression

Means: ANOVA, ANCOVA, H-test, t-Test (paired/independent), U-test (paired/independent)

Clustering, Dimension Reduction, Scaling: Cluster analysis (hierarchical, K-Means), discriminant analysis, correspondence analysis, principal component analysis, factor analysis, Rasch analysis with latent classes, Mokken scale analysis, reliability analysis, IRT models

Spatial Analysis: spatial regression models, spatial segregation, nearest neighbor analysis, centroids and distances, overlapping areas, count points in areas, sum line lengths, graphical illustration of layered geospatial data,

Content Analysis: quantitative content analysis for item validation (free associations)
