

Professor Lyndall Strazdins

Australian National University

Professor Strazdins is a research leader in work and health in contemporary, gender-mixed labour markets. Her focus has been the problem for health and gender inequality created by conflicts between long work hours and family care, and the need to address long work hours as a Work Health and Safety priority. She is an Australian Research Council Future Fellow and was awarded the EU Marie Skłodowska-Curie International Fellowship Seal of Excellence. Her papers have been among the top 5 in their year in her field. Professor Strazdins also leads research on time as a determinant of health, lack of time is one of the most important reasons why people do not exercise regularly or eat healthy food. She has been a scientific advisor to the Australian Government *Investing in Women*, seeking to support gender equality in employment in Asian labor markets. She has presented to the Japanese Gender Equality Bureau, and served as Scientific Advisor for multiple Federal and State Government initiatives including the Defense Forces, Health Promotion and Work Health and Safety. Professor Strazdins has worked closely with Professor Jianghong Li at the WZB for over a decade, and this seminar reports on new insights for work, health and gender equality emerging from this collaboration.
